DO YOURSELF A FAVOUR

ENGINEERING TECHNICIAN (ENG TECH) THROUGH BINDT

The Engineering Council Working Group (ECWG), which is a sub-committee of the BINDT's Membership Qualification and Education Committee (MQ&E), has recently conducted a matching exercise between the requirements of the Engineering Council's UK Specification for Engineering Technicians (Eng Tech) and the requirements of both Graduate Membership and PCN Level 2 Certificate holders.

The results of this matching exercise, which has now been approved by the Engineering Council, are as follows:

If a candidate holds, as a minimum, Graduate Membership of BINDT and a PCN Level 2 certificate, the individual is now eligible for direct entry (without interview) to register as an Engineering Technician (Eng Tech) with the Engineering Council by application through BINDT.

Your Role in Industry Today?

Engineering today is all about working as a team. In their different ways, all the members of that team make a vital contribution, not least the Engineering Technician (Eng Tech).

Within the NDT industry, PCN Level 2s who are now eligible for Engineering Technician status play a crucial role in the development, production and maintenance of all kinds of product, plant and processes. Your skills, experience and understanding of engineering principles allow you to take everyday problems in your stride, which keeps costs down and production on track.

Indeed, the critical decisions you are called on to make can have a significant impact on business bottom line. Supervising the work of others is often one of your responsibilities.

Why Register?

The letters 'Eng Tech' after your name mark you out as a skilled professional. Widely recognised throughout engineering industries, both in the UK and overseas, it is a title that brings very important benefits.

These include:

- New career opportunities and improved prospects for promotion
- Official recognition of your talents and hard work
- Greater status and influence
- A chance to develop your knowledge and expertise, and thus, fulfil your true potential.

Additionally, there are advantages too for employers of Engineering Technicians.

In particular, they have the assurance of knowing that their key personnel have good skills and experience, and an attitude to match. This also inspires confidence in business clients.

FIRST STEPS

To register as an Engineering Technician you must be, or become, a Graduate Member of BINDT.

For Graduate Member (GInstNDT) you need to satisfy the following requirements:

1. Any person who has been actively engaged in the practice of NDT or related technology for at least 3 years may be elected to the grade of Graduate.
2. A candidate applying for entry or transfer to this grade shall meet the following requirements:
 - i) Possess a PCN Level 2 or other equivalent National or International Certificate, **and**
 - ii) Have a minimum of 3 years' combined training and experience in the profession of NDT or related technology.

Cost of application for Graduate Member is £15.00 and an Annual Fee of £70.00.

As a Graduate Member, please fill in the application for Eng Tech and send a copy of your PCN Level 2 Certification. This will automatically make you eligible for Eng Tech.

The normal cost of application for Eng Tech Registration is £50.00 and an Annual Fee of £15.80.

For a limited period BINDT, as an introductory offer, is cutting the total cost of application for Eng Tech Registration to £15.00.

Apply now and keep ahead of the competition.

The British Institute of Non-Destructive Testing, Newton Building, St George's Avenue, Northampton NN2 6JB, UK.
